

Advanced Burn Life Support (ABLS) Course

A standardized approach to burn assessment and stabilization in the critical first 24 hours.

Focuses on airway management, fluid resuscitation, burn size estimation, and early transfer decisions — using case-based, hands-on learning to strengthen field decision-making.

KEY SKILLS YOU'LL GAIN

- Focused primary & secondary assessment
- Rapid TBSA estimation
- Effective fluid resuscitation
- Identify inhalation & airway threats
- Apply ABA referral guidelines

MAY 18, 2026 | 7 CE HOURS (BRN & EMS)
